Case Study on Barrio Logan
ARB Study Session on Air
Quality and Land Use
October 4, 2004

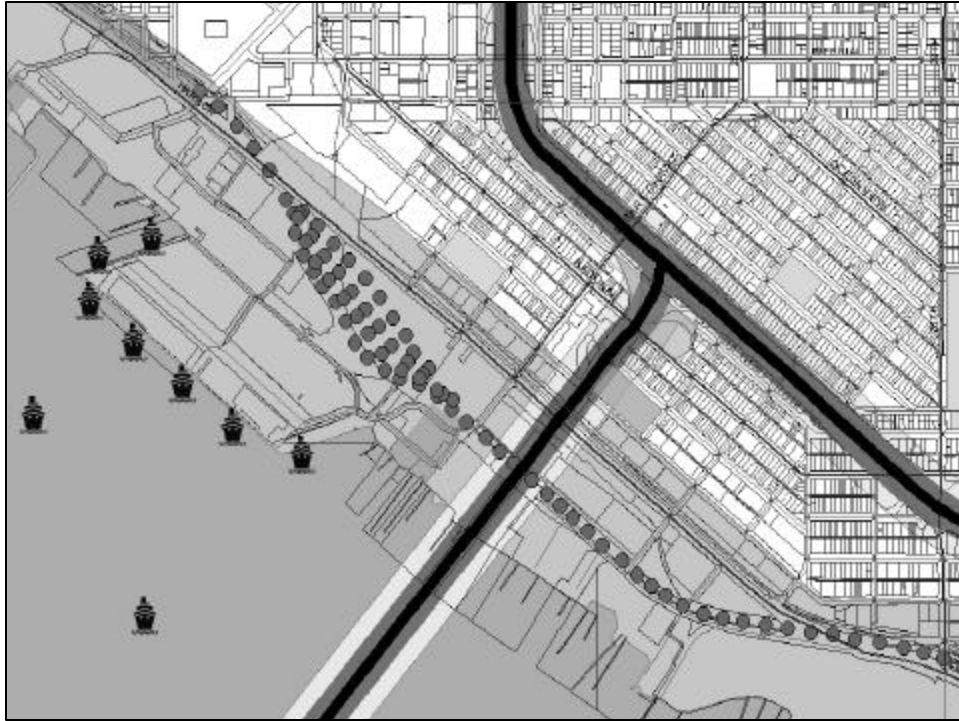

Living next door to Master Plating...

- ✂ Child living next door had severe asthma
 - ✂ Frequent school absences, emergency room visits
 - ✂ Parents had trouble maintaining a job due to frequent hospital visits
 - ✂ Couldn't go to park, beach, etc, because frequently had to be plugged into a breathing machine
- ✂ Since Master Plating closed
 - ✂ No emergency room visits
 - ✂ Switched to normal asthma medication
 - ✂ Behavioral problems from prior intense medication have evaporated

Community Demands for Future Development

- ✍ Relocate small industrial toxics sources
 - ✍ No buildings over three stories
 - ✍ More community services: Library, mail, pharmacy, sports and education, etc.
 - ✍ No housing development next to waterfront industries and freeways
 - ✍ More affordable rental housing
-

Importance of ARB Air Quality-Land Use Guidance

- ✍ Tool to prevent future land-use problems
 - ✍ Very important on zoning/planning context
 - ✍ Critical information given push towards “smart growth”, industrial/residential co-location
 - ✍ Importance in short-term (acute) and long-term impacts
- ✍ Tool which could assist in redevelopment of existing mixed industrial-residential areas
 - ✍ Guidance for rezoning
 - ✍ Guidance for identifying priorities for relocation
 - ✍ Guidance for development of infill housing at safe distances from industrial waterfront, freeways
